

Heating Safety

Never leave a burning candle unattended. Burning candles can start a fire.

Consider using battery-operated flameless candles, which can look, smell and feel like real candles.

Keep portable heaters at least 1 metre (3 feet) away from anything that can burn.

Turn heaters off when you go to bed or leave the room.

Never overload electrical circuits.

Keep your furnace area clean and uncluttered.

Have your furnace inspected and serviced once a year.

Never use your oven or stove to heat your home.

Never use a BBQ or propane heater indoors.

Have your chimney cleaned once a year.
