

Municipal Class Environmental Assessment Study: Cooksville Creek Erosion Control Project – South of Lakeshore Road

What?

The City of Mississauga (the City) is undertaking a Schedule B Municipal Class Environmental Assessment (Class EA) Study for erosion control and restoration of Cooksville Creek south of Lakeshore Road.

Why?

The City recognizes that this section of Cooksville Creek has been impacted by recent storm events and high lake levels and is in need of rehabilitation. Plans will also need to consider the deteriorated condition of the adjacent city trail through Helen Molasy Memorial Park that sits above the east bank of the creek, as well as the neighbouring properties which have experienced ongoing drainage issues.

How?

- The Study has examined this section of Cooksville Creek and Helen Molasy Trail and associated natural resources to identify existing problems, potential risks, and opportunities for restoration and drainage improvements.
- Through the Class EA process, various alternative solutions are being developed and evaluated by the Study Team and will be refined through public and agency consultation (see below). The Study Team will then select a preferred alternative and proceed with design of the recommended works.
- A Project File documenting the planning process will be available for public review at the end of the Study.

Public Consultation

- Consultation is an essential part of the EA process. The City would like anyone with an interest in the Study to have an opportunity to provide input and help inform the decision-making process.
- An in-person, Public Information Centre has been arranged to allow local residents and interested members of the public an opportunity to review and comment on the project findings to date, the alternative solutions being considered, the evaluation process, the preliminary preferred solution, and the next steps:

Date: October 29, 2024
Time: afternoon: 3pm – 5pm
evening: 6pm – 8pm
Location: Small Arms Inspection Building
1352 Lakeshore Road East

City of Mississauga

Notice of Public Information Centre

Municipal Class Environmental Assessment Study: Cooksville Creek Erosion Control Project – South of Lakeshore Road

- Additional project information will be made available on the City's project website:
<https://www.mississauga.ca/projects-and-strategies/environmental-assessments/cooksville-creek-erosion-control-south-of-lakeshore-road/>
- Feedback is encouraged and comments are requested by **November 26, 2024**. A comment form is available on the project website above. Input gathered through the public consultation will be used to support the EA study.
- If you have comments or questions, require further information or would like to be added to the Study mailing list to receive future notifications, please contact:

This notice signals the Notice of Public Information Centre for this Municipal Class Environmental Assessment, a study which will define the problem, identify/evaluate alternative solutions, and determine a preferred design in consultation with regulatory agencies and the public. The study is being undertaken in accordance with the planning and design process for Schedule 'B' projects, as outlined in the "Municipal Class Environmental Assessment" document (as amended in 2023), which is approved under the Ontario Environmental Assessment Act.

Personal information is collected under the authority of the Environmental Assessment Act and will be used in the assessment process. With exception of personal information, all comments shall become part of the public records. Questions about this collection should be directed to the Project Manager listed above.

This notice first issued on **October 17, 2024**.
