TREE TRUNK WRAPPING AS SPECIFIED IN PLAN TO BE REMOVED AFTER PLANTING. * ALTERNATE THREE STAKE REQUIREMENT TREE GUARD AS SPECIFIED IN PLANTING PLAN. -EARTH SAUCER MIN 100mm HIGH AROUND EXCAVATED AREA. CUT AND REMOVE WIRE BASKET TO A DEPTH OF 30cm. FOLD BACK AND BURY. REMOVE BURLAP FROM TOP OF ROOTBALL. TAPER AND SCARIFY PIT SIDES TO MIN DEPTH OF 150mm (6") COMPACT SOIL UNDERNEATH AND BESIDE ROOTBALL TO PREVENT SOIL SETTLING AND TO KEEP TREE STABLE. UNDISTURBED SUBSOIL. WASHED CHIP STONE FILTER TRENCH. Refer to plan & sections A-A', A2-A2' for dimensions 02950-1

1. All dimensions are in millimetres unless otherwise noted. This detail to be used in conjunction with pertinent specification.

2. Remove stakes and wires by second growing season or end of warranty period.

3. This detail is based on 8000mm O.C. street tree spacing. Dimensions appropriate to reach goal of 25 cubic metres of soil volume per tree.

4. Prune only dead, damaged or interfering branches. Leaders are not to be cut.

5. Tree pit to be excavated as per specifications. Depth of planting pit to be approved by Community Services representative.

6. Backfill with planting soil mix in accordance with specifications and approved planting plan.

7. Soil volume specifications based on loam soil, good drainage and no added irrigation.

8. All parting shall be done under the direction and supervision of personnel with at least 5 years hosticultural and planting experience and

Soli volume specifications based on loam soil, good drainage and no added irrigation.
 All planting shall be done under the direction and supervision of personnel with at least 5 years horticultural and planting experience and conform to best horticultural practices. Planting of plant material prior to Community Services approval will be at the contractors risk.
 Samples of mulch, top soil and tree accessories must be submitted to Community Services for approval.
 Plants shall be sound, healthy, vigorous and well branched. They shall be free of insect pests' eggs and larvae and shall have healthy well developed root systems. Community Services reserves the right to reject plant material that does not conform to planting plan specifications.
 Keep all plants watered from time of planting until acceptance.

Detail: 02950-17

MISSISSAUGA

DECIDUOUS TREE PLANTING Not to Scale

Topsoil Placement & Fine Grading

- 1. Ensure that the approval has been obtained for rough grading prior to proceeding with this section of
- 2. Scarify the rough graded areas to provide a loosened surface in order to allow bonding of the topsoil. 3. Spread topsoil on the prepared and accepted rough graded surface to a minimum depth of 450 mm firmly

4. Keep topsoil 25 mm below finished grade for sodded areas elsewhere bring topsoil up to finished grade of

- adjacent surfaces. 5. The finished surface is to be smooth and even with no ruts, clods or contaminants.
- Remove stones in excess of 10mm for area to be seeded. 7. Hand rake areas to be seeded or sodded as a final surface preparation coordinating the work to ensure that seeding or sodding can occur as soon as possible after raking has been completed.

- 1. Schedule deliveries in order to keep storage at job site to a minimum without causing delays. 2. Sod shall be certified #1 Nursery Grown sod containing 50% merion blue grass and 50% Kentucky blue grass. It shall be no greater than 40mm (1-1/2") in thickness and with accordance with the classification of
- turf grass sod for the province by the national sod growers association. 3. Obtain approval of topsoil grade and depth before starting sodding. Areas to be smooth graded by a landscape grader and hand raked to provide a completely smooth and even surface.
- 4. Lay sod in rows, perpendicular to slope, smooth and even with adjoining areas and with joints staggered. Butt sections closely without overlapping or leaving gaps between sections. Cut out irregular or thin sections with a sharp knife.
- Stake all sod on slopes greater than 1:5 (20%).
- Roll sod immediately after laying to press sod firmly on to the surface soil. Water immediately after sod laying to obtain moisture penetration through sod into top 100mm (4") of topsoil. Water by means of a water truck or if approved, by hydrant to obtain a complete drenching. Watering by small hose and sprinkler is not sufficient. For the first 30 days, soak to this depth at least once
- 8. Water in similar manner thereafter if sufficient rain does not fall, in order to keep the underlying surface moist. Watering until acceptance of the sod is the contractors responsibility.
- Immediately clean up soil or debris spilled onto pavement and dispose of deleterious materials. 10. Sodded areas will be accepted and warranty period begins provided that: 10.1. Sod is completely green
- 10.2. Sodded areas have been cut minimum of two times 10.3. Sod is knit to underlying soil and cannot be lifted when tugged by hand. 11. It is the contractors responsibility to maintain sod until time of sod acceptance. Maintenance of sod after acceptance is the responsibility of owner.
